

Fermentation Station

Agenda

- 1 | The Idea
- 2 | The Plan
- 3 | The Costs
- 4 | The Risks
- 5 | The Team

Idea

Delicious

Healthy

Food Science

... but can be expensive

**Maintain a
Favourable
Environment**

Why build it yourself?

Usually expensive and clunky

Heating is a gamble

Little control

Too many cables

Plan

Functions

Presets for common ferments

Temperature Control up to 60°C

Humidity Control

Runtime over Days/Weeks

Fermentation Box

ATmega328

Capacitive Touch Control

LCD *or* E-Ink Display

Sensors & Actuators

Heat & Humidity Sensor

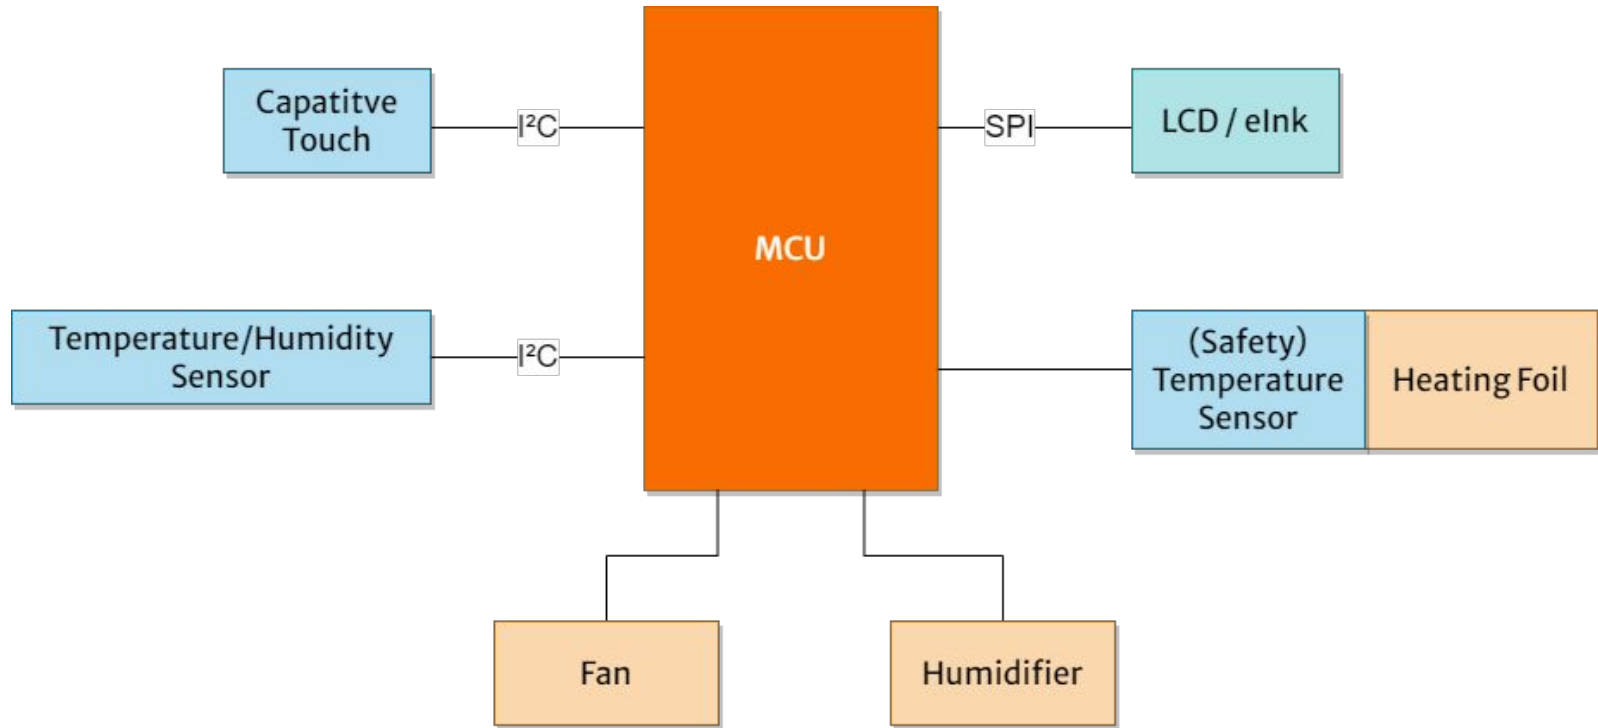

Humidifier

Heating Foil

PC Fan

Hardware / Software

Milestones

Costs

< 100€

Risks

Risks

Fire Hazard
